# H.E.R.O. Helping Emergency Responders Overcome, Inc.

- Members attended H.E.R.O. training in July. H.E.R.O. is a Non-Profit initiative to help challenge the barriers of the first responder culture that create a stigma around their need for mental health and trauma support. We offer free trainings to help educate on the historic culture of the emergency responder, and how evidence today suggests they are currently at an increased risk for PTSD and Mental Health challenges and require support to manage the impact of this profession. We work to normalize that due to the workplace trauma they are exposed too daily, they can be negatively impacted in a way that leads to sometimes fatal outcomes, no one is considering what the responder lives through and works through daily and there are very limited support systems in place. We will work to raise donations to help connect emergency responders to treatment resources need for their emotional wellness. We will raise money through selling merchandise, fundraising, and grants. We are a full-service clinical team with vast knowledge and experience in the specialty of treating first responders and will also help to build partnerships with local departments, to support their internal needs, and implement strategies to support employee assistance with mental health, trauma, and substance abuse treatment. As well as work to provide intervention strategies to help those they want to intervene on and place people in treatment versus jail. This is a collaborative effort to help change the culture, breaking the stigma, challenging mistaken beliefs and perceptions, and building a new opportunity for emergency responders to seek help when in need.

# Sprinkler and Alarm System Training

- Members of the Fire Department attended training of Sprinkler Systems and Fire Alarm Systems. This training is a refresher on the technical functions of each system and how each system is supposed to function in an emergency.

# Trench Rescue Operations Level

- Members of the department participated in a Trench Technical Rescuer Operations Level certification course in the month of July. This course trains the rescuers in trench rescue and recovery.

# Training on New Apparatus

- Members of the Department have started training on the new Engine 36 which is stationed at the Cardington-Stonehurst Fire House. Members will go through numerous hours of driver training and pump training before it is put into service. We are happy to have this new fire engine available as part of the frontline fleet protecting our citizens in Upper Darby Township.

# July 2023 Community Risk Reduction Activities
